*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 23-57, drawn to a rolling rock bit with angled flow ramp defining junk slot having greater cross-sectional area at its top than at its bottom or with flow ramp having first and second portions at different angles from the longitudinal axis, classified in class 175, subclass 339.
  - II. Claims 58-64, drawn to a rolling cone rock bit with cutting element(s) on the leg extending below an uppermost portion of the cone attached to the leg, classified in class 175, subclass 374.

The inventions are distinct, each from the other because of the following reasons:

The shape or/and arrangement of the flow ramps specifically called for in the claims of Group I is not required in the claims of Group II. Conversely, the cutting element on the leg and its position relative to the cone specifically called for in the claims of Group II is not required in the claims of Group I.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
